

# ARCHITECTURE CONSULTING

## CONSULTING SERVICES FOR SOLUTION ARCHITECTURE DEVELOPMENT

Our Architecture Consulting service offers comprehensive consulting services for the development of solution architectures for your digital product. Whether you are at the beginning of a new project or looking to expand existing systems, we guide your design to success.

## SCALABLE PLATFORMS FOR SCALING BUSINESS

### **Our Approach**

We enable technology decision-makers to design efficient, future-proof, and scalable architectures that lay the foundation for successful digital products. We are open to different technologies and providers.

### **Why QVEST**

- Expert development of start and target architecture
- Ensuring architecture compliance and documentation
- Accelerating time-to-market through effective developer coaching
- Avoiding costly redesigns through early validation

# OUR SERVICES

- **Conception:** We develop a robust and future-proof architecture for complete platforms or components.
- **Integration:** Expert integration of components into existing architectures while considering quality standards and documentation.
- **Governance:** Ensuring compliance with the defined architecture, avoiding proprietary developments with conflicting technologies.

# OUR ESTABLISHED APPROACH

## Multi-Stage Approach

Architectures evolve with customer requirements and adapt with the organization. We ensure that your platform architecture not only aligns with your functional requirements but also remains flexible for expansion. Following the Agile Manifesto, the top priority is the deliverability of working software.

## Proof of Concept

We test architectures to assess their real-world utility. Through a POC, we validate with you whether the chosen architectural approach aligns with your requirements and gather initial experiences. This way, we avoid the „shot in the dark“ and can gradually approach the real scenario and validate assumptions.

## Simple Developer Onboarding

Due to the aforementioned continuous changes in organizations and architectures, information and rationales for decisions are often lost. With Architecture Decision Records, we prevent the need to make the same decision twice while also enabling easier onboarding of new developers. A quicker understanding of the framework of your platform development helps developers orient themselves, leading to faster productivity.

## Objective - Digitally Strong, Rapid to Market - Your Success, Our Commitment

Our goal is to establish your digital product on a robust technical foundation while ensuring that your developers effectively implement the requirements of your business side with modern development methods.
